Löwe,2021-07-08 This book offers a novel account of Aquinas s theory of the human act It argues that Aquinas takes a human act to be a composite of two power exercises where one relates to the other as form to matter The formal component is an act of the will and the material component is a power exercise caused by the will which Aquinas refers to as the commanded act The book also argues that Aquinas conceptualizes the act of free choice as a hylomorphic composite it is materially an act of the will but it inherits a form from reason As the book aims to show the core idea of Aquinas s hylomorphic action theory is that the exercise of one power can structure the exercise of another power and this provides a helpful way to think of the presence of cognition in conation and of intention in bodily movement **Weaver's Cove LNG Project, Mill River**
