Freakonomics was written by Steven D Levitt and Stephen J Dubner Levitt is an economist who is known for making connections that other people do not see while Dubner is a journalist for the New York Times The book started as an article about Levitt that Dubner was writing for the New York Times in 2003 They wrote the book together as an attempt to bring economics to the masses to show in an interesting and conversational way on how economics can prove that conventional wisdom is often wrong and how it can shed new light on confusing situations The book was published in 2005 and has somewhat become controversial for its findings

Economics Made Fun N. Emrah Aydinonat, Jack J Vromen, 2017-10-02 Best selling books such as Freakonomics and The Undercover Economist have paved the way for the flourishing economics made fun genre While books like these present economics as a strong and explanatory science the ongoing economic crisis has exposed the shortcomings of economics to the general public In the face of this crisis many people including well known economists such as Paul Krugman have started to express their doubts about whether economics is a success as a science As well as academic papers newspaper columns with a large audience have discussed the failure of economics to predict and explain ongoing trends The emerging picture is somewhat confusing economics made fun books present economics as a method of thinking that can successfully explain everyday and freaky phenomena On the other hand however economics seems to fail in addressing and explaining the most pressing matters related to the field of economics itself This book explores the confusion created by this contradictory picture of economics Could a science that cannot answer its own core

questions really be used to explain the logic of everyday life This book was originally published as a special issue of the Journal of Economic Methodology

Think Like a Freak: a 30-Minute Summary of Steven D. Levitt and Steven J. Dubner's Book
InstaRead Summaries Staff,2014-06-13 PLEASE NOTE This is a summary of the book and NOT the original book Think Like a Freak A 30 minute Summary of Steven D Levitt and Steven J Dubner s book Inside this Instaread Summary Overview of the entire book Introduction to the Important people in the book Summary and analysis of all the chapters in the book Key Takeaways of the book A Reader s Perspective Preview of this summary Chapter 1 After writing Freakonomics and Superfreakonomics Steven Levitt and Stephen Dubner were asked many questions about how to deal with a wide variety of problems Since problem solving is difficult and time consuming they decided to write a book to teach thinking skills instead of trying to offer solutions to specific problems The first important idea to keep in mind is that selfish incentives are not as effective as communal incentives when considering how to solve a problem Most people tend to put their own interests before the interests of others This is human nature and often makes it difficult to get several people to move in the same direction towards a specific goal There is no right or wrong way to think about solving a problem In the modern world people must become more productive creative and rational in their thinking The first two books written by Levitt and Dubner were based on a few basic ideas First incentives are the foundation of modern life and figuring them out is the key to understanding and solving any problem Next conventional wisdom often turns out to be incorrect and blindly following it can lead to disastrous outcomes Finally correlation does not equal causality In other words just because two things are identified together does not mean that one causes the other This book builds on these three basic principles but is more prescriptive than the previous two titles The book is inspired by an economic approach relying on data rather than an ideology to understand how the world works how resources are allocated and the obstacles that can get in the way of getting resources to those who need them The good news is that thinking like a freak is so easy that anyone can do it The question is why so few people actually do it
