Examination Coach Jerome D. Kaplan, 2007-01-01 The Brilliance of Black Children in Mathematics Jacqueline Leonard, Danny B. Martin, 2013-03-01 This book is a critically important contribution to the work underway to transform schooling for students who have historically been denied access to a quality education specifically African American children The first section of the book provides some historical perspective critical to understanding the current state of education in the U S specifically for the education of African American children The following sections include chapters on policy learning ethnomathematics student identity and teacher preparation as it relates to the mathematical education of Black children Through offering counternarratives about mathematically successful Black youth advocating for a curriculum that is grounded in African American culture and ways of thinking providing shining examples of the brilliance of Blacks students and promoting high expectations for all rather than situating students as the problem the authors of this book provide powerful insights related to the teaching and learning of mathematics for African American students As is made evident in this book effective teaching involves much more than just engaging students in inquiry based pedagogy Kitchen 2003 The chapters offered in this book demonstrate how mathematics instruction for African American students needs to take into account historical marginalization and present day policies that do harm to Black students Kunjufu 2005 Empowering mathematics instruction for African American students needs to take into consideration and promote students cultural spiritual and historical identities Furthermore mathematics instruction for African American students should create opportunities for students to express themselves and the needs of their communities as a means to promote social justice both within their classrooms and communities **Catalog of Copyright Entries. school history curriculum He reinterprets troublemaking usually cast as a behavioral deficit as an intellectual asset and form of reasoning that challenges the disciplining reason of classrooms where whiteness is valued over the histories and knowledge of people of color Dozono shows how what are traditionally framed as discipline problems can be seen through a different lens as responses to educational practices that marginalize non white students Discipline Problems reveals how students of color seek out alternate avenues for understanding their world and imagines a pedagogy that champions the curiosity intellect and knowledge of marginalized learners
