Indigenous Technology Knowledge Systems Mishack T. Gumbo, P. John Williams, 2023-07-21 There has been a growing interest in indigenous knowledge systems and research This interest has been mainly triggered by the need to decolonize education as a response to the colonial onslaught on indigenous knowledge and people Research has however concentrated on the generality of the indigenous knowledge system rather than on its related dimensions One area that has suffered a lack of attention is indigenous conceptions of science technology engineering and mathematics STEM despite the unquestionable evidence of STEM in indigenous contexts Most STEM is presented by colonial establishments and representations especially in developed modern urban contexts which portray STEM as a colonial construct This book focuses on indigenous technological knowledge systems education ITKSE Indigenous people have been at the front of technological developments from pre colonial times The list of precolonial industries science and technology is extensive including blacksmithing wood carving textile weaving and dyeing leather works beadworks pottery making architecture agricultural breeding metal working salt production gold smithing copper smithing leather crafting soap making bronze casting canoe building brewing glass making and agriculture for example In some parts of the world such as Africa and Australia these technologies still exist ITKSE should not be left to exist outside of the technology education curriculum and classroom as it can benefit both indigenous students who have been denied learning about what is relevant to them and non indigenous students These cultural groups can expand their knowledge of technology by learning both ITKSE and Western technological knowledge systems education WTKSE ITKSE also presents opportunities for technology teachers to reflect on and revisit their depth of technological knowledge pedagogies and assessment The intent of this book is transformational in the sense that it brings decolonial and indigenous perspectives into the technology education context It extends technology education in the sense that it will not only influence Western minded architects artisans designers etc but encourage indigenous mindedness as well Technology Applications Quarterly ,1990 **Cellular Automata Technology** Supreeti Kamilya, Sukanta Das, Enrico Formenti, 2025-06-20 This book constitutes the refereed conference proceedings of the 4th Asian Symposium on Cellular Automata Technology ASCAT 2025 held in Ranchi India during March 6 8 2025 The 16 full papers included in this book were carefully reviewed and selected from 35 submissions This symposium aims to explore the latest insights and innovations in multiple theoretical aspects of Cellular Automata Technology and their applications across various domains *Official Gazette of the United States Patent and Trademark Office* ,2002 **Equity In Mathematics Education** Gabriele Kaiser, 2005-08-08 This text provides a critical overview of current thinking about equity issues in the teaching and learning of mathematics Grounded in feminist theories of curriculum change and a broad range of cultural perspectives the new approaches described here go beyond special programmes and experimental treatments designed to correct perceived problems and deficits Instead they establish how improved instructional practices and a fuller

Biopolymer-Based Nanomaterials in Drug Delivery and Biomedical Applications, Hriday Bera, Chowdhury Mobaswar Hossain, Sudipta Saha, 2021-01-05

Over the past few decades, there has been unprecedented progress in the design of versatile biopolymer-based nanoplateforms for pharmaceutical and biomedical applications, particularly due to their attractive traits including excellent biocompatibility, outstanding biodegradability, low immunogenicity, and facile chemical modifiability.

Biopolymer Based Nanomaterials in Drug Delivery and Biomedical Applications serves as a clear and detailed body of information on the synthesis and characterization of biopolymer-based materials in nanomedicine. This book describes various nanomaterials consisting of biopolymers including polysaccharides (i.e., derived from plants, animals, bacteria, algae, and fungi) and polypeptides in terms of their structures, synthetic protocols, and characterization and uses as therapeutic drugs and gene delivery carriers and in other biomedical fields.

The chapters of this book, which are contributed by internationally renowned scholars working in the arena of biopolymer-based nanomaterials, would offer a wide vision on the potential future applications of these nanomaterials in the delivery and targeting of bioactive molecules of pharmaceutical interests and in tissue engineering, biosensing, bioimaging, and diagnostic purposes. The state-of-the-art information presented in the book would also encourage young investigators and researchers to further bring cutting

edge developments in the field of nanomedicine in the near future Provides a scholarly insight into the recent development of biopolymer based nanomaterials Focuses on the diverse cutting edge techniques for the fabrication of native and modified biopolymer based nanoplatfroms and their applications in drug delivery and biomedical fields Assesses the opportunities and challenges of biopolymer based nanocarriers in pharmaceutical and biomedical research Princeton Alumni Weekly ,1978
