The Independent Study Catalog National University Continuing Education Association (U.S.),1989 *Intermediate Algebra* Andrea Hendricks,Oiyin Pauline Chow, Professor,2012-01-13 Today s Developmental Math students enter college needing more than just the math and this has directly impacted the instructor s role in the classroom Instructors have to teach to different learning styles within multiple teaching environments and to a student population that is mostly unfamiliar with how to be a successful college student Authors Andrea Hendricks and Pauline Chow have noticed this growing trend in their combined 30 years of teaching at their respective community colleges both in their face to face and online courses As a result they set out to create course materials that help today s students not only learn the mathematical concepts but also build life skills for future success Understanding the time constraints for instructors these authors have worked to integrate success strategies into both the print and digital materials so that there is no sacrifice of time spent on the math Furthermore Andrea and Pauline have taken the time to write purposeful examples and exercises that are student centered relevant to today s students and guide students to practice critical thinking skills Intermediate Algebra and its supplemental materials coupled with ALEKS or Connect Math Hosted by ALEKS allow for both full time and part time instructors to teach more than just the math in any teaching environment without an overwhelming amount of preparation time or even classroom time *Forthcoming Books* Rose Arny,1997-12 *Student Study Guide for Intermediate Algebra* Helen I.

when he started teaching with MyMathLab but he noticed that most students started their assignments by going directly to the MyMathLab homework exercises without consulting their textbook. This inspired Kirk to write a true eText built within MyMathLab to create a dynamic seamless learning experience that would better meet the needs and expectations of his students. Completely clickable and fully integrated, the Trigsted eText is designed for today's learners. Intermediate Algebra is also available with two printed resources to provide additional support for your classroom. The eText Reference is a spiral bound printed version of the eText that provides a place for students to do practice work and summarize key concepts from the online videos and animations. In addition to the benefits it provides students, the eText Reference also provides portability for those instructors that prefer a printed text for class preparation. The Guided Notebook is an interactive workbook that guides students through the course by asking them to write down key definitions and work through important examples for each section of the eText. This resource is available in a three hole punched unbound format to provide the foundation for a personalized course notebook. Students can integrate their class notes and homework notes within the appropriate section of the Guided Notebook. Instructors can customize the Guided Notebook files found within MyMathLab. This package contains the MyMathLab Access Kit and the Guided Notebook.
