Diagnostic Controversy Carolyn Smith-Morris, 2015-08-20 This collection is dedicated to the diagnostic moment and its unrivaled influence on encompassment and exclusion in health care Diagnosis is seen as both an expression and a vehicle of biomedical hegemony yet it is also a necessary and speculative tool for the identification of and response to suffering in any healing system Social scientific studies of medicalization and the production of medical knowledge have revealed tremendous controversy within and factitiousness at the outer parameters of diagnosable conditions Yet the ethnographically rich and theoretically complex history of such studies has not yet congealed into a coherent structural critique of the process and broader implications of diagnosis This volume meets that challenge directing attention to three distinctive realms of diagnostic conflict in the role of diagnosis to grant access to care in processes of medicalization and resistance and in the transforming and transformative position of diagnosis for 21st century global health Smith Morris s framework repositions diagnosis as central to critical global health inquiry The collected authors question specific diagnoses e g Lyme disease Parkinson s andropause psychosis as well as the structural and epistemological factors behind a disease s naming and experience

chapters broadens the volume's focus to think about responsibility of individuals other than patients including medical professionals and policymakers including specific consideration of the role of responsibility during pandemics *Culture, Diversity and Health in Australia* Tinashe Dune, Kim McLeod, Robyn Williams, 2021-05-30 Australia is increasingly recognised as a multicultural and diverse society Nationally all accrediting bodies for allied health nursing midwifery and medical professions require tertiary educated students to be culturally safe with regards to cultural and social diversity This text drawing on experts from a range of disciplines including public health nursing and sociology shows how the theory and practice of cultural safety can inform effective health care practices with all kinds of diverse populations Part 1 explores key themes and concepts including social determinants of health and cultural models of health and health care There is a particular focus on how different models of health including the biomedical and Indigenous perspectives intersect in Australia today Part 2 looks at culturally safe health care practice focusing on principles and practice as well as policy and advocacy The authors consider the practices that can be most effective including meaningful communication skills and cultural responsiveness Part 3 examines the practice issues in working with diverse populations including Indigenous Australians Culturally and Linguistically Diverse Australians Australians with disabilities Australians of diverse sexual orientation and gender identity and ageing Australians Part 4 combines all learnings from Parts 1 3 into practical learning activities assessments and feedback for learners engaging with this textbook *Culture Diversity and Health in Australia* is a sensitive richly nuanced and comprehensive guide to effective health practice in Australia today and is a key reference text for either undergraduate or postgraduate students studying health care It will also be of interest to professional health care practitioners and policy administrators Psychiatrization of Society Timo Beeker, Sanne te Meerman, China Mills, Anna Witeska-Mlynarczyk, 2024-02-13 Worldwide there have been consistently high or even rising incidences of people classified as mentally ill paired with increasing mental healthcare service utilization over the last decades While psychiatric institutions have been consistently expanding psychiatric knowledge has become increasingly dispersed and globalized making psychiatric vocabularies and classificatory systems widely available shaping increasing areas of life creating powerful markets for therapeutic services of all kinds and impacting how we understand ourselves and others This process can be described as the psychiatrization of society Psychiatrization is highly complex diverse and global although it takes different forms in different contexts involves various actors with largely diverging motives and is part of a wider assemblage of the psy disciplines **Masters of Uncertainty** Phaedra Daipha, 2015-11-17 Though we commonly make them the butt of our jokes weather forecasters are in fact exceptionally good at managing uncertainty They consistently do a better job calibrating their performance than stockbrokers physicians or other decision making experts precisely because they receive feedback on their decisions in near real time Following forecasters in their quest for truth and accuracy therefore holds the key to the analytically elusive process of decision making as it actually happens In *Masters of Uncertainty* Phaedra Daipha develops a

new conceptual framework for the process of decision making after spending years immersed in the life of a northeastern office of the National Weather Service Arguing that predicting the weather will always be more craft than science Daipha shows how forecasters have made a virtue of the unpredictability of the weather Impressive data infrastructures and powerful computer models are still only a substitute for the real thing outside and so forecasters also enlist improvisational collage techniques and an omnivorous appetite for information to create a locally meaningful forecast on their computer screens Intent on capturing decision making in action Daipha takes the reader through engrossing firsthand accounts of several forecasting episodes hits and misses and offers a rare fly on the wall insight into the process and challenges of producing meteorological predictions come rain or come shine Combining rich detail with lucid argument Masters of Uncertainty advances a theory of decision making that foregrounds the pragmatic and situated nature of expert cognition and casts into new light how we make decisions in the digital age **Why Wellness Sells** Colleen Derkatch,2022-12-13

How and why the idea of wellness holds such rhetorical and harmful power In **Why Wellness Sells** Colleen Derkatch examines why the concept of wellness holds such rhetorical power in contemporary culture Public interest in wellness is driven by two opposing philosophies of health that cycle into and amplify each other restoration where people use natural health products to restore themselves to prior states of wellness and enhancement where people strive for maximum wellness by optimizing their body s systems and functions **Why Wellness Sells** tracks the tension between these two ideas of wellness across a variety of sources including interviews popular and social media advertising and online activism Derkatch examines how wellness manifests across multiple domains where being well means different things ranging from a state of pre illness to an empowered act of good consumer citizenship from physical or moral purification to sustenance and care and from harm reduction to optimization Along the way Derkatch demonstrates that the idea of wellness may promise access to the good life but it serves primarily as a strategy for coping with a devastating and overwhelming present Drawing on scholarship in the rhetoric of health and medicine the health and medical humanities and related fields Derkatch offers a nuanced account of how language belief behavior experience and persuasion collide to produce and promote wellness one of the most compelling and harmful concepts that govern contemporary Western life She explains that wellness has become so pervasive in the United States and Canada because it is an ever moving and thus unachievable goal The concept of wellness entrenches an individualist model of health as a personal responsibility when collectivist approaches would more readily serve the health and well being of whole populations **Artificial Intelligence for Societal Issues** Anupam Biswas,Vijay Bhaskar
