

Social Work Research Paper

Introduction

The report is based on an interview conducted at a medical social work agency. The primary purposes of this investigation were: to explore the organization and its delivery of services given to the society, and to understand and assess the function of the workers at the medical social work agency. This report attempts to provide a qualitative analysis of the organizational context of the services rendered, and the influences this has on agency practice, standards and functioning. In this study, we will begin with an overview of the agency, then we will look at the necessary avenues of a social worker in the healthcare sector; their roles and responsibilities to their firm and as a worker of the community, and finally the techniques used in the agency for working with the different parts of a community or society. Avenues such as practice and intervention, client population, ethical standards and professionalism in dealing with issues arising within the firm, will be explored. The data was collected via a single interview and thus all data collected and analysed would be assumed as the standard for all social workers in the organization.

An Overview of the Agency

The name of the organization of focus was The Eastern Regional Health Authority (ERHA), located in Mayaro. It was founded in 1994 as an act of parliament and is one of five health authorities in the Republic of Trinidad and Tobago. ERHA is responsible for healthcare in Trinidad's eastern area which consists of places accounting for approximately one-third of Trinidad's land mass. The agency covers from Rio Claro in the south, to Valencia in the east (The Government of the Republic of Trinidad and Tobago, 2018). The organization works in line with the Ministry of Health in Trinidad and Tobago and it functions based on clusters which separate the different areas. The number of health facilities in the different areas will account for the varying of cluster numbers. According to the social worker, the area of research is split into two clusters and this is done throughout the different branches of the organization for easier management. Also, social work in ERHA is divided into two professional groups, psychiatric social workers and medical social workers.

Vision Statement, Mission Statement and Values of the Agency

The vision and aims of the agency are to continuously improve the quality of life for clients by delivering quality health care that is accessible to all. The mission statement and intended actions of the agency are to promote social welfare while collaborating with the community and by focusing on the needs of the population, the agency provides help for members of the community. It allows members of society to obtain several healthcare services that they may not be able to obtain, within the guidelines of national social policy.

The core values of the agency that define their identity and actions are as follows:

Pocket Guide to Preparing Social Work Research Articles Bruce Thyer, 2008-02-14 The art of writing up a completed research project in a format suitable for submission to a social work journal is an ability separate from one's skills as a research methodologist. It is also an ability that despite its importance is often overlooked by research courses and senior level mentors. This straightforward pocket guide to Preparing Research Articles steps into the void as an insider's guide to getting published. Drawing on nearly 20 years of experience editing a social work research journal, Bruce A. Thyer has crafted a candid companion to the journal publishing process, unraveling the mysteries that students as well as many established researchers might otherwise stumble over and as a result their prospectus for future success improve. Thyer's frank advice on selecting an appropriate journal, handling rejections and revisions, understanding confusing concepts like impact factors and electronic publishing, and avoiding common methodological and formatting pitfalls constitute a gold mine for the fledgling researcher/writer.

Feminisms in Social Work Research Stéphanie Wahab, Ben Anderson-Nathe, Christina Gringeri, 2014-07-25 Social work as a profession and academic discipline has long centered women and issues of concern to women such as reproductive rights, labor rights, equal rights, violence, and poverty. In fact, the social work profession was started by and maintained in large part by women and has been home to several generations of feminists, starting with recognized first wave feminists. This wide-ranging volume both maps the contemporary landscape of feminist social work research and offers a deep engagement with critical and third wave feminisms in social work research. Showcasing the breadth and depth of exemplary social work feminist research, the editors argue that social work's unique focus on praxis, daily proximities to privilege and oppression, concern with social change, and engagement with participatory forms of inquiry place social workers in a unique position to both learn from and contribute to broader social science and humanities discourse associated with feminist research. The authors attend here to their specific claims of feminisms, articulate deep engagement with theory, address the problematic use of binaries, and engage with issues associated with methods that are consistently of interest to feminist researchers such as power and authority, ethics, reflexivity, praxis, and difference. Comprehensive and containing an international selection of contributions, *Feminisms in Social Work Research* is an important reference for all social work researchers with an interest in critical perspectives.

Social Work Research and Evaluation Richard M. Grinnell, Yvonne A. Unrau, 2008 Refined with input from students and instructors who used the previous seven editions, the authors have updated, rearranged, and added to the latest edition of this popular textbook. It contains six new chapters, four on evidence-based practice, emphasizing how important it is for students to master that concept and it lays the foundation for their understanding of it by providing a comprehensive explanation of both qualitative and quantitative research methods. This edition is more current, useful, and aesthetically pleasing than ever before and is sure to hold its place as one of the premier textbooks for research methods courses, appreciated by students and professors alike.
