

Name: _____ Date: _____

Student Exploration: Solar System

Vocabulary: atmosphere, ellipse, gas giant, gravity, inner planet, orbit, outer planet, planet, rocky planet, solar system, year

Gizmo Warm-up

On the *Solar System* Gizmo, check that the ORBIT tab is selected. At first you can only see the four **inner planets**. The distances of the planets to the Sun are to scale, but sizes are not.

Move the cursor over each planet to learn its name. What are the four inner planets?

These planets are called **rocky planets** because their surfaces are rocky.

1. Click the “–” button (upper right) three times to zoom out. What are the names of the four **outer planets**?

These planets are called **gas giants** because they are essentially huge balls of gas.

2. Before 2006, while Pluto was still considered a planet, people used this saying to remember the nine planet names: “My very excellent mother just sent us nine pizzas.”

Come up with a new sentence to help remember the eight planet names, in order.

Activity A: Planetary orbits	<u>Get the Gizmo ready:</u> • Check that the ORBIT tab is still selected. • Click the “o” button to reset the zoom level. • Be sure that the Speed is set to Slow. • Turn on Show orbits.	
---	--	--

Question: How long is a year on each planet?

1. **Observe:** The path a planet takes around the Sun is its **orbit**. Planets move in orbits because of the Sun’s **gravity**, a force pulling inward toward the Sun. Click **Play** (▶).

A. What is the shape of orbits? _____

The actual shape of an orbit is an **ellipse**, or flattened circle. Planetary orbits are only slightly flattened so that they look almost perfectly circular to the naked eye.

B. Which planet’s orbit looks the least like a circle? _____

2. **Measure:** Click **Reset** (↺). Now you will measure how long it takes each planet to orbit the Sun. Notice that the date shown below the simulation is today’s date.
 - Drag an **arrow** from the left of the Gizmo and place it next to Mercury.
 - Click **Play**. When Mercury completes one orbit (reaches the arrow), click **Pause**.
 - Record **Today’s date** and the **One orbit date** in the first row of the table below.
 - Do the same steps for each planet, filling in the table as you go.
 - For the outer planets, zoom out (–) and increase the **Speed** of the simulation.

Planet	Today’s date	One orbit date	Year length	
Mercury			Months	Days
Venus			Months	Days
Earth			Years	Months
Mars			Years	Months
Jupiter			Years	Months
Saturn			Years	Months
