Tarot Decoded Elizabeth Hazel, 2004-05-01 Most readers interested in tarot own a couple of different decks as well as some tarot cookbooks that explain the meaning of the cards and their symbolism like Cliff Notes for tarot These tarot tools result in fairly standard mundane readings But there is another level to tarot a level that can turn an ordinary tarot reader into a true adept Tarot Decoded transforms ordinary tarot readings into readings that are profound and even surprising by explaining the use and significance of tarot dignitaries Tarot dignitaries are the interaction of the cards with each other in a spread and within a range of correspondences Tarot author Elizabeth Hazel presents a concise useable system for working with tarot dignities to add incredible depth to readings One card placed next to another might not have a readily apparent connection but interpreting tarot dignities could make it very clear that one card enhances or hinders the meaning of another The same is true for tarot neighborhoods within a spread as well as the entire reading Using the Tarot Decoded system for working with tarot dignities can take anyone to the next level of tarot reading The book offers a progressive look at the cards their dignities and their correspondences With Hazel s advice and clear examples and a little practice readings take on a new depth integration and power

Road School Sue Cowley, 2016-11-30 Frustrated by a regime of statutory testing and keen for a midlife adventure Sue Cowley and her partner decided to step out of the system and set off on the educational adventure of a lifetime with their children Road School is the story of their family s adventures around Europe and across China and what they learned along the way Part comedy travelogue part parenting guide part educational philosophy Road School asks you to consider what an education really means and offers tips for anyone planning their own learning adventure As a parent in the UK you must make sure that your child has a full time education once they are of compulsory school age However this education does not have to take place in a school A growing number of parents are finding that home educating or unschooling either permanently or on a short term basis is a viable and attractive option The national curriculum benchmark tests and exams serve to reinforce the idea that there is a specific set of knowledge which equates to an education However when you are home educating it is entirely up to you what and how you wish to teach your children Or rather what and how you wish your children to learn You might choose to include part or everything that is in the national curriculum or you might not Sue s family found that one of the best things about Road School was the freedom to follow their

interests Sue offers plenty of advice based on the lessons her family learned on their Road School adventure such as take into account how learning can happen simply by visiting a place and exploring it Don t feel that you always have to formalise your visit by turning it into a lesson The experience of going somewhere can be memorable and educational in its own right Much of what your children will learn on the road is social and emotional rather than intellectual They learn how to cope how to adapt how to be resilient and how to be brave The challenges and difficulties that you face on the road will teach them all these things without any direct teaching needed at all Involve your children in making decisions about the content of their curriculum particularly when it comes to choosing topics or themes What would they most like to study during your learning journey together You can teach subjects such as English or history through cross curricular themes rather than as discrete lessons Ask your children to decide which topics interest them the most and capitalise on those One of the great things about educating your child yourself is that you get to learn alongside them Not only do you provide a model of lifelong learning but it s also very liberating to learn new things as an adult Remember that teaching is not the same thing as learning You don t have to teach your children directly for a set number of hours each day in order to educate them Learning can take place all the time and anywhere rather than just during school hours It doesn t matter what time of the day or day of the week it is if there is learning happening then your child is being educated Contents include England English Lessons Stepping Out of the System The Netherlands Dutch Lessons The Practicalities Germany German Lessons Cultural Literacy Italy Italian Lessons An Education Portugal Portuguese Lessons Travelling with Children France French Lessons Pussycat Parenting China Chinese Lessons A Road School Curriculum **Fundamentals of Aircraft and Rocket Propulsion** Ahmed F.
