COMPACT EXCAVATOR EC15

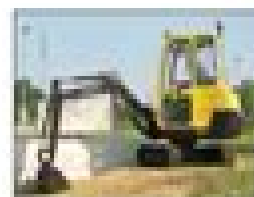

Ultra performance

The EC15 is designed to provide with two undercarriage versions - a 900 mm wide fixed undercarriage to get anywhere - a variable width undercarriage 900 to 1000 mm for improved lateral stability without sacrificing ability to access narrow sites.

Fast travelling to save time

The EC15 is provided with two travel speeds, including a fast speed to speed up machine travel on the site.

The boom offset for working alongside a wall

The hydraulic offset of the boom makes it possible to follow the small dimensions of the excavator and to work alongside a wall.

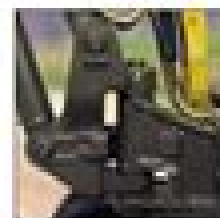

Quick coupling

The exclusive quick coupling enables an accessory to be hooked quickly without having the operator to get off the machine or to allow two hands on the controls.

Compact rear impact protection

The rear compact dimensions of the Volvo excavator make them to work safely in the narrowest sites. The rear-angled shape of the counterweight provides the machine with excellent protection against all impacts.

A steady way ahead

The double roller gear multiplies the bearing surface on the chains. As two sets maintain a long time in the track for a better distribution of stress and therefore less wear and less deformation.

Secure and very precise controls

The resistance and precision of the programmed controls enable the most delicate work to be done quickly and well.

Direct steering control without delay

The hydrostatic valve allows the steering wheel directly without a selector arm. The rear wheel is also in the correct wheel flow, therefore no resistance can be shown by.
