

Description, general

The ECR34 is a Compact excavator with caterpillar drive

The engine is a water-cooled inline diesel engine with direct injection of the D1.60D1.6R type, 3-cylinder low emission engine with automatic idle shut-off.

The drive movement takes place via two tracks. Each track is driven by an axial piston engine with two speeds and a planetary gear.

The hydraulic system is a hydraulic load-sensing system which guarantees complete independence of the individual movements.

The superstructure pivot movement is guaranteed by a hydraulic radial piston motor which directly (i.e. without reduction gear) drives a pin-mounted bevel ring gear with internal coating and remote lubrication.

The undercarriage consists of a centre section in X-form to increase the torsional rigidity and stiffened side members.
