Social Interactions Knowing The Meaning Of Social Networking:

Social Interactions Jan Jordan, 2014-12-25 The friends that you can make are just one of the many benefits to social networking online Another one of those benefits includes diversity because the internet gives individuals from all around the world access to social networking sites This means that although you are in the United States you could develop an online friendship with someone in Denmark or India Not only will you make new friends but you just might learn a thing or two about new cultures or new languages and learning is always a good thing As mentioned social networking often involves grouping specific individuals or organizations together While there are a number of social networking websites that focus on particular interests there are others that do not The websites without a main focus are often referred to as traditional social networking websites and usually have open memberships This means that anyone can become a member no matter what their hobbies beliefs or views are However once you are inside this online community you can begin to create your own network of friends and eliminate members that do not share common interests or goals Get more info here *Social interaction, identity and language learning during residence abroad* Rosamond Mitchell, Nicole Tracy-Ventura, Kevin McManus, 2015-08-10 Study and residence abroad are important for adult second language learning promoting oral skills fluency and sociopragmatic competence in particular alongside broader intercultural competence However learner achievements during residence abroad are variable and cannot be fully understood without attention to the social settings in which learners engage and the social networks they develop This edited collection explores the relationship between sociocultural experience identity and language learning among student sojourners abroad Three broad themes are identified the contribution of different settings host families student exchanges work placements etc to language learning opportunity the role of social networks in sojourners language practices and learning success and their evolving social identities The book is relevant for a readership interested in informal second language learning as well as for managers of residence abroad programmes *Intelligent Open Learning Systems* Przemysław Różewski, Emma Kusztna, Ryszard Tadeusiewicz, Oleg Zaikin, 2011-07-29 In presented book the Intelligent Open Learning Systems IOLS are proposed described discussed and evaluated The IOLS is a system in which traditional methods of online teaching are enhanced through the use of artificial intelligence and cognitive science This is the main topic of the book It consists of ten chapters and is divided into three parts The first part concentrates on the Open Learning System OLS analysis in particular the social and educational meanings of the OLS the new role of the teacher and the new requirements regarding the structure of didactic material Moreover the cybernetic model of student teacher and computer collaboration is presented the teaching learning process content and its main characteristics are discussed and the system based approach to the OLS design is proposed The second part is focused on the problem of knowledge modeling in the OLS based on the ontology and the competence approaches and leading to the learning object concept and competence management in open systems The third part describes applications of the OLS in the
