David Schwantes, 2007-09 Cocoon demonstrates in easy to understand language that ethics is about trust and happiness Trust is the essential ingredient to mutually supportive and durable relationships focused on reducing life's imperfections Such relationships are the key to happiness But we cannot live deep inside protective cocoons and still build

trust and relationships Instead we must develop all the dimensions of what makes us human intellectual truth spiritual unity moral goodness and aesthetic beauty Above all we have to know ourselves and be able to pass the mirror test every day Our most important relationship after all being with ourself and we don't discover our spiritual unity without a Personal Strategic Plan Nor can we become ethically fit without enthusiasm equanimity and a commitment to excellence traits not found in cocoons Only ethical fitness can help us find the resolution to the fundamental ethical dilemmas we all face truth versus loyalty short term versus long term individual versus community and justice versus mercy This book suggests we use a variety of lenses to look at the world today power wealth prestige status We use the lenses of economics politics and technology We do not use nearly enough the lens of ethics relationships happiness decency and the golden mean Once we're ethically fit the result of continuous practice we're able to recognize ethical dilemmas approach them skillfully and resolve them successfully This book shows the way to such fitness which is useful in any context or relationship personal local or global Cocoon is a self improvement book of the first order with real life macro illustrations of the ethical dilemmas we face in a complex and crowded world in which too many of us pursue the dictates of false gods It includes over 500 practice questions and was developed as a textbook in the ethics courses the author taught to seniors at Ramapo College from 2002 to 2003

The Man Who Challenged America Laurence Brady, 2013-03-08 Born in Glasgow in 1850

Thomas Lipton was one of the world's first global entrepreneurs. His showmanship, business flair, and customer-driven focus created a chain of nationwide grocery stores and the thriving Lipton tea business, making him a multi-millionaire. One key to his success was his complete control of every business he undertook, from production to the customer. A keen yachtsman, he mounted a British challenge against the American holders of the America's Cup on five occasions between 1898 and 1930 but was unsuccessful each time. Yet in the process of doing so, his fame spread around the world, and his name became a byword for sportsmanship and diplomacy. What is more, Lipton's astute association of business with a sport of international dimension established a trend that has become an accepted part of life today. Lipton exemplified the values of competitiveness, sportsmanship, perseverance, and leadership in global business. Yet until now, no biography of Lipton has brought together these strands. Published at the advent of the America's Cup in Europe in 2007, this book reassesses and re-evaluates the life of the man whose dream it was to wrestle the Cup from American hands. Software Development, 2005

The Fictions of American Capitalism Jacques-Henri Coste, Vincent Dussol, 2020-02-26

The Fictions of American Capitalism: Working Fictions and the Economic Novel introduces a new way of thinking about fiction in connection with capitalism, especially American capitalism. These essays demonstrate how fiction fulfills a major function of the American capitalist engine, presenting various formulations of American capitalism from the perspective of economists, social scientists, and literary critics. Focusing on three narratives: fictitious capital, working fictions, and the economic novel, the volume questions whether these three types of fiction can be linked under the sign of capitalism. This collection seeks to illustrate the American economy's dependence on fictitiousness, America's ideological fictions, and the nation's creative literary fiction. In relation to what the credit and banking crisis of 2007-2008 exposed about the unreal base of the economy, the volume concludes with a call to recognize the economic humanities, arguing that American fiction and American literary studies can provide a useful mirror for economists.

Into the Storm Dennis N. T. Perkins, Jillian B. Murphy, 2013

Winner of the Small Business Book Awards from Small Business Trends 2013

The Sydney Hobart Yacht Race is among the most demanding sailing competitions in the world. Unpredictable seas make the 628 nautical mile course grueling under the best conditions, but the 1998 race proved to be the most perilous to date when a sudden and violent storm struck. Winds gusted over 100 mph, and monstrous 80-foot waves towered over boat masts. Six sailors perished, and another 55 were saved in what became the largest search and rescue operation in Australia's history. In the face of turmoil and tragedy, a crew of amateur sailors piloted their tiny vessel, the AFR Midnight Rambler, not only to the finish but to overall victory. While bigger, better-equipped yachts attempted to maneuver around the storm, Ed Psaltis and his crew made the daring decision to head directly into its path. Their triumph, perhaps even their survival, owes itself to an extraordinary level of teamwork, an alchemy of cooperation, trust, planning, and execution. *Into the Storm* chronicles their nearly four-day ordeal and draws parallels to the world of business, revealing 10 critical strategies for teamwork at the edge. Illustrated with examples from the story and compelling case studies, the book sheds light on what

teams need to do to succeed in tough times Finally Into the Storm provides resources and tools to support teams as they navigate the chaotic seas of business today *Reflections on Leadership and Career Development* Manfred F. Roman, Alice_ch3n81, 2021-12-06 How does coding change the way we think about architecture? This question opens up an important research perspective. In this book, Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information. They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books. Focusing on the intersection of information technology and architectural formulation, the authors create an evolving intellectual reflection on digital architecture and computer science. *All the Money in the World* Peter W. Veteran journalists Peter W. Bernstein and Annalyn Swan delve into who made and lost the most money in the past twenty-five years, the fields and industries that have produced the greatest wealth, the biggest risk takers, the most competitive players, the most wasteful family feuds, the trophy wives, the most conspicuous consumers, the biggest art collectors, and the most and least generous philanthropists. Incorporating exclusive, never-before-published data from Forbes magazine, *All the Money in the World* is a vastly entertaining behind-the-scenes look at today's Big Rich. **Next Level** David Komolafe, 2017-01-31
