ocabulary: coefficient, combination, compound, decomposition, double replacement, element, molecular, product, reactant, single replacement, synthesis, synthesis

Prior Knowledge Questions (Do these BEFORE using the Gizmo.) (The answers are inside the Gizmo, but try to answer the questions on your own first.)

1. When cooking with the Gizmo, what **raw ingredients** (reactants) are changed into **finished products** (products)?

2. According to the Gizmo, how many grams of hydrogen, oxygen, and water are in the reaction? How many (a) molecules (b) moles are in the reaction?

Student Exploration

Now, let's use the Gizmo to balance the reaction. **Reactants** are the starting materials. **Products** are the substances formed. In this reaction, the reactants are hydrogen and oxygen. The products are water. The balanced chemical equation for the reaction is:

1. When the reaction starts, what is the equation?
2. How many atoms of each element are in the reactants?

3. How many hydrogen atoms are in the reactants? How many in the products?
