*Percutaneous Approaches to Valvular Heart Disease, An Issue of Interventional Cardiology Clinics* Samin K. Sharma, Igor Palacios, 2012-01-28 Among the most recently developed procedures for treating heart disease in a minimally invasive way are the techniques for percutaneous treatment of valvular heart disease These are important advances because the only alternative is open heart surgery which is not an option for many high risk patients This issue provides a detailed description of several percutaneous procedures including trans catheter aortic valve implantation

Transcatheter Mitral and Tricuspid Valve Therapies Tiffany Patterson, Omar Chehab, Bernard Prendergast, transcatheter valve therapies have emerged as a viable treatments option for patients deemed high risk for conventional surgery Whilst transcatheter aortic valve implantation TAVI is now established as the standard of care in high

risk aortic stenosis patients the mitral and tricuspid frontiers have proved to be more challenging Anatomical heterogeneity device development refining patient selection and until recently the absence of randomised data have all been contributing factors For mitral regurgitation transcatheter edge to edge repair TEER now benefits from positive randomised data along with significant advancements in device technology Transcatheter mitral valve replacement TMVR options are also making rapid progress More recently tricuspid regurgitation has become the central focus of the structural heart community having previously been referred to as the forgotten valve
