

Name: _____

Date: _____

Standard Explanation: Ray Tracing (Refraction)**Vocabulary:** incident ray, refracted ray, normal, critical angle, magnification, real image, virtual image**Prerequisite Knowledge Questions** (Use Science 802-0208 as your guide.)

For several questions, it would be helpful to have a mental representation of a lens (focal length) and ray diagrams including at least one of the following:

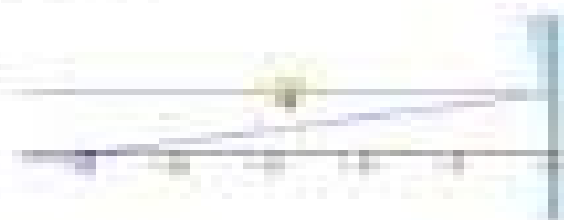

1. Look at yourself in the back of that spoon (the side opposite the bowl side). What do you see?

Get up and try it.The back of a spoon is an example of a **convex mirror**.

2. What do you see when you look at yourself the front of a spoon? **Get up and try it.**

The front of a spoon is an example of a **concave mirror**.**Classroom Activity**

Use your drawing reference diagram above as well as a flashlight positioned to the left of a convex lens ray diagram to see the light bulb in the center and mirror.

To begin, students draw a diagram of the lens. Students draw a lens. Label the lens. Draw a light bulb in the center of the lens. Draw a flashlight to the left of the lens. Draw the light rays passing through the lens. Draw the image of the light bulb in the center of the lens.

3. The lens is in the back of the mirror. Is the **magnification** of the mirror. Draw the light bulb in the back of the mirror. What is the **magnification** of the lens that is **reflected** from the mirror?

Get up and try it. The light bulb is a light bulb. The light bulb is a light bulb.
